

AIO OUTDOOR STRING LIGHT

Installation Instructions

- Let your imagination guide you in enhancing your outdoor space. Whether it's a patio, gazebo, porch, balcony, or garden.
- Install string light without bulbs in desired location. If using hooks, make sure they are rated for the appropriate weight and environment.
- Link multiple string lights together by attaching female end of one string to male of another. When chaining strands do not exceed max wattage of 570W.
- Attach shades by removing socket ring and spacer (if needed), then sliding shade over socket threads and reattaching socket ring.
- Insert bulbs.
- Plug in to outdoor outlet.
